

Some things just make a sound...

...sense!

Presenting advanced wireless security for all that matters the most to you. Innovative solutions that alert you in case of fire, attempted burglary or any forced entry. Customised solutions that make sound sense for banks, offices, showrooms, warehouses and even homes.

GRANDALERT

An advanced cell phone based wireless security system

Presenting the GrandAlert range of wireless electronic security systems that caution you with timely alarms enabling you to prevent unfortunate incidents such as fire and robbery by swinging into immediate action.

The System comprises of sensors at key points that, when triggered, send a signal to control panel which in turn raises an alarm and sends notifications through PSTN or wireless GSM network. The system has a fail safe 'No False Alarm' due to technical failures resulting in reliable notifications and a trigger for immediate action. The efficacy of these alarm systems makes them amazing deterrents for potential miscreants and are available in 4 Zone*, 6 Zone and 90 Zone variants.

Features

Wireless addressable system
(*6 and 90 Zone only)

Health Check feature that enables constant monitoring and upkeep of all integrated sensors

Power back up of 5 days in case of electrical failure

Integration of both Fire and Intrusion alarms on a single Panel

GSM based system frees you of dependence on internet

Powered with an amazing 'Zero False Alarm' due to technical failures

Each zone can be separately armed or disarmed

90 Zone Wireless Control Panel

Relevant accessories & sensors

Wireless MCP

Wireless PIR (human body) Sensor

Wireless door/ Window / shutter / Strong room Sensor

Wireless smoke detector

Wireless panic switch

HOME COP

Stand-alone alarm system for main door

An amazingly simple security solution for residential requirements that raises an alarm in case of forced entry through your door when you are away on a holiday or sleeping at home.

- Remote operated for maximum safety - one remote cannot match the other system, multiple code-combinations are possible
- Remote controlled security alarm operated with dry batteries - no more mains supply needed
- No more shock hazards - Child-Safe
- No rechargeable batteries needed – just 3 batteries of 9V (6F22 type) are sufficient to provide a life of over 1 year
- Sound output 110 db at 1 Meter, with acoustic, hard plastic device
- Water resistant (No paper cone speaker)
- Easy to install and maintain (Patented Design) - directly mounted on the door from inside
- System life expectancy almost 10 years

Home Cop

CASH COP

A bag that is designed to give the shock of his life to a robber!

News about incidents of businessmen or bank officials having been robbed of the cash and valuables they were carrying with them are not uncommon. Carrying cash or other valuables is always risky as it makes the person carrying it vulnerable and puts his or her life at risk. CASH COP is designed in a way that gives a shock to a snatcher without actually killing him.

Features :

- High Voltage, High Frequency electric shock impulses used, which are non-lethal (0.3 Joules only)
- No Back-Shock: When activated, the snatcher of the bag would receive shock but the owner will not receive any back shock if he nabs the snatcher
- Electric Shock voltage is about 20,000 Volts! It can pass through leather gloves or dry paper but will not penetrate into muscles and will travel on skin only (as per LENZ law)
- Electronic Chain or Jack Loop for in-transit safety. Once activated by opening of jack-loop, it will not get deactivated even if jack loop pin is re-inserted
- Easy to control by uniquely coded REMOTE, ARM, DISARM and JACK-LOOP activation
- Rechargeable battery-back up with 72 hours stand by time
